## Introduction

Welcome to DC YouthLink, a coalition of community-based organizations that provide a diverse array of services to court-involved youth in their neighborhoods. DC YouthLink **Service Coalition Members** are comprised of at least a dozen independent non- and for-profit Service Providers that specialize in positive and developmentally appropriate services for youth including mentoring, tutoring, family support, recreation, arts, mental health, and more. The Service Coalition Member Directory was created to provide contact information, as well as a description of the services DC YouthLink Providers offer to DYRS youth.

DC YouthLink is unique in its approach to service delivery. It is a primary example of how a juvenile justice agency can systematically draw from broad, research-based Positive Youth Development principles to help youth succeed. Positive Youth Development (PYD) is grounded in the belief that when young people are treated as assets by their communities and given the right system of supports and services, they can reach their full potential. While PYD is broadly focused on the developmental needs of young people generally, Positive Youth Justice (PYJ) focuses on the specific developmental needs of young people involved in the juvenile justice system. The PYJ model adapts the traditional 40 developmental assets identified through PYD, honing them to six core developmental domains:

- **Community:** Civic engagement, community leadership, services, responsibility
- **Creativity:** Personal expression, visual arts, performing arts, language arts
- **Education:** Literacy, credentials, learning skills, career planning
- **Health:** Physical activity, diet and nutrition, behavioral health, lifestyle and sexuality
- **Relationships:** Communication skills, conflict resolution, family systems, intimacy and support
- **Work:** Work experience, apprenticeships, employment readiness, income and independence

DYRS has focused on aligning DC YouthLink to the PYJ framework. Through DC YouthLink DYRS youth are provided services in each of the PYJ developmental domains.<sup>1</sup> The goal of DC YouthLink is to reduce the likelihood of re-offending and aid youth in making a successful transition to adulthood by meeting the developmental needs of youth and building on youth assets and potential.

<sup>1</sup> Currently, there are no services in the Creativity domain for FY 2014.
